

Managing complex projects and programmes Overview

Overview:

This Workshop is aimed to help people who are managing complex projects or programmes with multiple workstreams and projects either within an organisation or across a system and who have knowledge and experience of project and/or programme management.

The workshop builds from the key concepts of project management introduced at foundation level and introduces different concepts and approaches for leading projects of increasing scale, scope and complexity.

Throughout we will consider major pitfalls and help people think about critical success factors and the importance engaging and involving people in the process of change and learning.

The workshop will cover:

- the key concepts of project management and help people think about the approaches for managing different projects and programmes of work
- systems thinking and complexity science and how these concepts can provide helpful insights into managing complex projects and programmes of transformational change
- the role, skills and competencies of the project/programme lead
- managing risk, reporting, oversight and governance

Who should join this session:

Anyone who has experience as a project or programme manager who wants to gain insights into how to approach managing complex projects and programmes of transformational change
