

Strategy fundamentals Overview

Overview:

Participants will learn what strategy is and what it is not, what makes for a good strategy, and how to apply strategic thinking to their team, organisation or system. Elect's Strategy & Systems team have extensive experience of strategic work across the NHS. Their approach emphasises compassion, co-creation and organisational learning. This philosophy is particularly well suited to the emergent, place based context in which ICS leadership communities operate. There will be group work throughout this session so attendees will need audio and video connection.

Learning objectives:

- Defining “strategy”
- Seeing the relationship between organisational mission, vision, strategy and culture
- Engaging stakeholders in the co-creation of a strategy that reflects collective insights and maximises commitment of all concerned
- Understanding how to support the values of the compassionate learning organisation through engaged, purposeful strategy

Requirements:

This is an interactive workshop. Attendees will need working audio and video to participate. You will be involved in discussions about your own experience of the topic within the workplace throughout. Please join the session from a location where you can speak openly
